

You know you've always wanted to cook on gas.

Kitchen by Delawood Designs www.delawood.co.za

*So join the top chefs - and cook with Easigas
- in your own home.*

Electricity is the ideal energy for your home. You can use it for lighting, powering your DVD and your new, flat screen plasma. You can even use it for cooking.

But, have you ever wondered why top chefs don't?

Easigas is the cooking fuel of choice by professional chefs world-wide. Infinitely variable constant heat that obeys you. Perfect for cooking, frying, roasting,

steaming, stewing, baking and, especially, for simmering those delicate sauces.

There is no "warm up/cool down" time with Easigas saving you time, and money. On those balmy summer evenings, take your cooking outdoors with a gas patio braai and, when winter comes around, you'll be warm as toast with an Easigas powered heater or fireplace.

In addition to ensuring a constant supply of Easigas to your home, we are also happy to assist in your choice of gas appliances and to recommend your nearest Easigas installer.
